## Volute Wine in a Single Serving Can

Filed under: planet grape news & reviews — admin @ 3:11 pm

Wine to go is here!

Shatterproof, eco-friendly 187ml aluminum bottles of white, rose, and red Bordeaux from VOLUTE Wines are now available for \$4 a pop. The white is a medium-bodied, unoaked, and refreshing Sauvignon Blanc, and the red is a soft, appealing, and very French Merlot, with tobacco, plum, and earth notes. Skip the rose - something happened to its freshness either in the winemaking, or, more likely, in the package.

As opposed to glass, aluminum is more commonly recycled, unbreakable, and generates less transportation-related pollution due to its lower weight. It has a 30% less carbon footprint than glass, and also shields the wine from harmful UV light. Visit <http://www.volutewine.com/> for more info.
